R kernel always dead: Jupyter and anaconda for R

*Posted by* SEHRA *on* OCTOBER 12, 2016

Got this issue as IRkernal was dying after restarting in jupyter-notebook.

The problem appeared to be with the IRkernel version. The following script after installation using R or Rstudio resolved the issue

```
install.packages(c('repr', 'IRdisplay', 'pbdZMQ', 'devtools'))
devtools::install_github('IRkernel/IRkernel')
IRkernel::installspec()  # to register the kernel in the current R installation
```
